# October 2019

## Fondly Falling for Fall

### Lake City Mural Unveiling

On Friday, October 18, the Lake City Boys & Girls Club held a mural unveiling to showcase the new artwork created by Columbia artist, Christine Lutfy. Members of the community came to the Club to see the beautiful new piece and receive a tour of the facility by Lake City Unit Director, Tony Taylor.

Tony has been working hard to make fun updates to the Lake City Boys & Girls Club for members to enjoy, including the addition of a jumbo Connect Four, and a life size checkers set! It was a wonderful gathering and a great way to bring the community together!!

# Robotics Demonstration

The Florence BGC Robotics Team came to the October Corporate Board Meeting to demonstrate what they had learned in their Robotics Club. Florence BGC members have been working very hard to build the robot they call "Dash." They have programmed it to weave in and out of obstacles in its way. They are hoping to program it to recognize colors and complete small tasks.

# Fall Crafts in Lake City

Lake City Boys & Girls Club members made paper mache pumpkins to celebrate Halloween! They inflated balloons, tied yarn around them to give them shape, and covered them with paper mache materials. This is just one of many arts and crafts projects that the members have completed. Boys & Girls Club staff work hard to create engaging projects for members. We can't wait to see what they will do around Thanksgiving and Christmas!

# Teen Tutors for Hartsville Members

Students from the SC Governor's School of Science and Mathematics have been tutoring Hartsville Boys & Girls Club members every week since the beginning of school! Members are transported to the Governor's School for homework help and tutoring. This partnership has fostered lasting positive relationships for our members, as well as provided them with positive role models. Our members love to visit their tutors every week, as they make the learning process fun and interactive!
